EDUCATION

University of Nebraska–Lincoln

May 2027

B.S. Computer Science, Minor in Music | **GPA: 3.937**

Lincoln, NE

- **Coursework:** Data Structures & Algorithms, Design & Analysis of Algorithms, Operating Systems, Computer Systems Engineering, Software Engineering, Software Security in Practice

EXPERIENCE

Design Studio Associate

Aug. 2026 – Present

Raikes School Design Studio

Lincoln, NE

- Selected for a year-long, industry-sponsored software development program delivering a production-oriented solution for an external client.

Information Technology Intern – Applications Development

Feb. 2026 – Present

Metropolitan Utilities District

Omaha, NE

- Implemented a database-backed admin feature across Java, JSP, JavaScript, and SQL by adding a DAO query and REST GET endpoint returning JSON data and replacing a legacy prompt workflow with an HTML dropdown.
- Built a server-side date-validation utility for service forms, enforcing business-day, holiday, and earliest-date rules even when client-side JavaScript is bypassed.
- Coordinated water-meter and impact-fee changes across three application repositories and the database, using SQL updates and resolving a frontend state bug that appeared after page refreshes.
- Improved ArcGIS/SAP outage workflows by preventing duplicate submissions, correcting conditional popup failures, and adding Esri-powered automatic zoom.
- Externalized Java application constants into a .properties-based configuration system with a custom loader, removing hard-coded values.

Undergraduate Learning Assistant

Jan. 2026 – May 2026

University of Nebraska–Lincoln

Lincoln, NE

- Guided students through introductory Python programming, debugging, and problem solving during labs and office hours.

Undergraduate Teaching Assistant – Data Structures & Algorithms

Aug. 2025 – Dec. 2025

University of Nebraska–Lincoln

Lincoln, NE

- Mentored students on data structures, algorithms, debugging, and complexity analysis during office hours.

PROJECTS

Ordo | React, ASP.NET Core, PostgreSQL, xUnit, Docker

[Live](#) | [GitHub](#)

- Built and deployed a full-stack personal finance platform with expense tracking, monthly category budgets, statement import and confirmation, and historical spending insights.
- Designed a risk-sensitive AI-assisted engineering harness governing issue-scoped execution, automated verification, approval gates for high-risk changes, protected human merge authority, and GitHub-backed project state.
- Developed a statement-import workflow that converts financial records into reviewable transactions, supports corrections and duplicate detection, and atomically persists user-confirmed expenses while preserving source provenance.
- Engineered production infrastructure and account security with ASP.NET Identity, JWT authentication, Gmail API recovery, rate limiting, PostgreSQL migrations, GitHub Actions, Docker, Vercel, Render, and Neon.

Templo Bautista Website | React, Vite, GitHub Actions

[Live](#) | [GitHub](#)

- Independently designed and built a responsive website for a local church, working directly with stakeholders to deliver a production website.
- Built reusable React interfaces and configured GitHub Actions for automated build and deployment to GitHub Pages.

Online Grocery Store | C#, ASP.NET Core, EF Core, React, xUnit

[GitHub](#)

- Took ownership of the backend and database for a team e-commerce application, implementing product, customer, cart, and persistence functionality.

TECHNICAL SKILLS

Languages: Java, C#, Python, C, JavaScript, SQL

Frameworks/Libraries: ASP.NET Core, Entity Framework Core, React, JSP, xUnit

Tools/Platforms: Git, Docker, GitHub Actions, PostgreSQL, SQL Server, MySQL, REST APIs, ArcGIS, Vercel, Render
